1 · AT A GLANCE

WHERE YOUR PROTEIN COMES FROM, AND WHAT WOULD MOVE IT.

WWF

26.7%

Plant share of protein-rich foods (FG1)

Planetary Health Diet: 60%

WWF

52.3%

Plant share of the whole diet

Planetary Health Diet: 74%

PROTEIN TRACKER

35.9%

Plant share of all protein sold

Measured at level A: 55% of protein

WWF · Tonnes of product, dairy equivalents

Protein Tracker · Tonnes of protein

Key findings

32% of all the protein sold comes from Fresh Meat & Poultry, almost all of it animal.

80% of animal protein comes from three departments: Fresh Meat & Poultry, Dairy & Eggs and Cheese.

54% of protein is own label, at a plant share of 39% against 33% for brands: the lever you control most directly.

16% of protein comes from Grocery, 99% of it plant: the plant engine of the catalogue.

How to read this report

WWF Planet-Based Diets counts tonnes of product, with dairy in dairy equivalents. The Protein Tracker counts tonnes of protein. Altera AI applies both to every product, separately: the two are never merged, so their figures differ.

2 · WHERE THE PROTEIN COMES FROM

WWF · food groups, whole products

Tonnes of product, dairy in dairy equivalents. Plant share by weight.

FG1	Protein-rich foods	4,305 t	**27%**
FG2	Dairy and alternatives	7,513 t	**10%**
FG3	Fats and oils	404 t	**68%**
FG4	Fruit and vegetables	5,556 t	**100%**
FG5	Grains	2,137 t	**100%**
FG6	Tubers	530 t	**100%**
FG7	Foods high in fat, salt, sugar	938 t	**84%**

Protein Tracker · the four classes

Share of all protein sold.

Animal core **61%** Composite **6%** Plant-based non-core **24%** Plant-based core **9%**

Protein Tracker · by department

Tonnes of protein sold, plant and animal.

Fresh Meat & Poultry	418 t	**0%**
Grocery	215 t	**99%**
Dairy & Eggs	150 t	**0%**
Cheese	110 t	**0%**
Frozen	73 t	**62%**
Fish & Seafood	72 t	**0%**
Bakery	65 t	**95%**
Fruit & Vegetables	62 t	**100%**
Breakfast & Snacks	51 t	**83%**
Deli	50 t	**13%**

Ready Meals	22 t	**49%**
Beer, Wine & Spirits	4 t	**100%**
Soft Drinks & Water	3 t	**65%**

Plant Animal Plant share

3 · WHAT WOULD MOVE IT

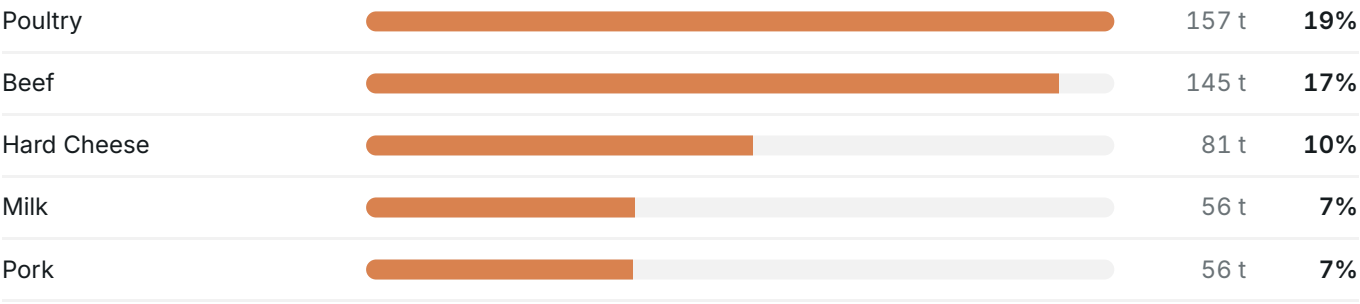

Three levers, computed

Each lever is computed product by product on the fictitious catalogue, all else equal. Points of plant share.

LEVER	WWF	PROTEIN TRACKER
Move 10% of red meat sales to plant-based mince	+3.6 pts FG1	+2.0 pts
Grow pulses, nuts and seeds sales by 25%	+4.2 pts FG1	+1.1 pts
Swap 15% of cow's milk for soya drink	+3.3 pts FG2	+0.6 pts

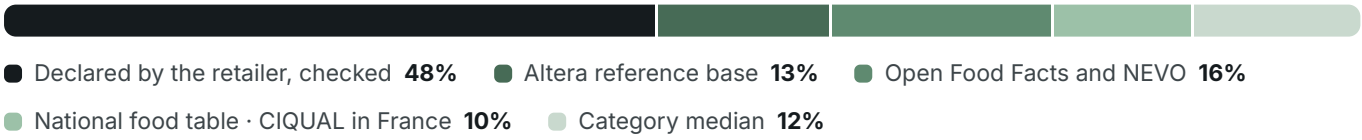

Where the animal protein is

The five families that carry the most animal protein.

Data behind the figures

Source of the protein values, weighted by protein sold

Measured at level A: 55% of protein. Accuracy is measured on a sealed control sample, reviewed by hand: 500 rows drawn at random, the 500 products weighing most in tonnes of protein, and the 3 best sellers of every category. One rate per field; this fictitious copy shows none.
